Musical Mondays 2024 with Carol McClure, BA, MCM

Harp

Beginning Harp: *The Angel's Harp*

For more than three decades, Carol McClure's class teaching curriculum for beginning students, *The Angel's Harp*[™], has served to introduce new and returning harpists around the world to sound technical and musical foundations in a friendly, cooperative group setting. Basics of technique, rhythm, melody, harmony, and expression are easily learned through games and creative activities taught in class by the teacher and continued at home by the with a guided study outline provided weekly. All the repertoire pieces in *The Angel's Harp*[™] *Two by Two Book 1a*, illuminate the Bible story of Noah. For this individualized instruction in a small-group setting. appropriately sized harps are provided for in-class use for the term.

- Classtime B for Public/Private/Homeschool Students 7-14: 4:00-4:45

Violin & Viola

Beginning Strings: *Suzuki & Beyond*

The Suzuki Method has long been the most widely used approach employed for teaching beginning string players in the United States. In the UK and Europe, students are taught via a curriculum based not only learning solo performance pieces, but also in musicianship skills that help the child's artistic development, no matter what instrument the child chooses to play. Combining these two approaches for more than thirty years, Carol McClure offers *Suzuki & Beyond*, a nurturing, comprehensive class (individualized instruction in a small-group setting) for beginners, teaching the basics of technique and tone production, along with solid foundations in rhythm, melody, harmony, and expression.

Dates of Class: Jan 22, 29 Feb 5, 12, 19, 26 Mar 4, 11, 18, 25
